

1 产品概述 Product Summarize

用于输电线路实现三相一次重合闸接线中，作为其中的主要元件。它是由时间元件DS-22，中间元件ZJ、电容器C、电阻R、信号灯等组成。

电磁式时间、中间元件加R、C器件构成。

It's used in three-phase primary re-closing connection of electricity transmitting lines, working as main component. It's composed of time relay of DS-22, auxiliary component of ZJ, capacitor C, resistance R and signal lamp.

2 主要技术参数 Main Technological Parameter

直流额定电压(V) DC rated voltage (V)	110,220
中间元件额定保持电流 DC(A) Rated retaining current of auxiliary component DC (A)	0.25,0.5,1,2.5
时间元件整定范围(s) Setting range of time component (s)	1.2 ~ 5
准备下次动作时间(s) Repairing time for next action (s)	15 ~ 25

3 安装开孔尺寸、接线图 Mounging plate opening size, Wiring drawing
