

1 产品概述 Product Summarize

用于信号电路。电源接通后，触点可周期性地接通、断开、使受控灯光闪光。

电磁式、阻容充放电原理。

It's used in signal lines. After electrified, it can be flashed due to its contact can be connected or disconnected periodically.

2 主要技术参数 Main Technological Parameter

额定值 DC(V) Rated value DC (V)	220,110,48
动作值 Action value	≤ 70% 额定电压 rated voltage
闪光频率(次) Flash frequency (time)	每分钟 40 ~ 80 40~80 times per 1 minute
功耗(W) Power wastage (W)	≤ 5
触点形式 Contact form	2 动合,1 动断 2 pairs of movable-connections, 1 pair of movable disconnection
触点容量 Contact capacity	≤ 250V ≤ 1A DC50W(有感); ≤ 250V ≤ 2A AC 250VA

3 安装开孔尺寸、接线图 Mounging plate opening size,Wiring drawing
