

1 产品概述 Product Summarize

本继电器主要用于交流电压 380 伏及以下，直流电压 440 伏及以下的控制电路中作为电流之用。

This series are mainly applying for controlling circuit of AC voltage 380V and below, DC voltage 440V and below as current.

2 主要技术参数 Main Technological Parameter

- 继电器的触头额定电流为 5 安培
 - 继电器的触头数量 2 对触头组合形成一常开、一常闭、二常开、或二常闭。
 - 继电器的动作电流规格如下，启动额定值，直流或交流动作(两种方式只能选用一种规格)：
 1, 1.5, 2.5, 5, 10, 15, 25, 40, 60, 100, 150, 300, 600
- The contact rated current of relay is 5A.
 ·2 groups of contacts of the relay, and the contacts type is 1 normally open, 1 normally closed, 2 normally open, and 2 normally closed.
 ·The operating current specification of the relay is as below: State rated value, DC or AC operate (choose one specification): 1, 1.5, 2.5, 5, 10, 15, 25, 40, 60, 100, 150, 300, 600.

3 安装开孔尺寸、接线图 Mounging plate opening size, Wiring drawing
