

### 1 产品概述 Product Summarize

用于交流发电机的单相差动保护线路，作为主保护。整流型，相应比较原理。

This series are applying for single-phase differential protective circuit of generators as main protection. This series are rectifier type, and adopt corresponding comparison principle.

### 2 主要技术参数 Main Technological Parameter

额定电流(A) Rated current (A)	5,1
额定频率(Hz) Rated frequency (Hz)	50,60
电流整定范围 Current setting range	0.5 ~ 1 倍额定电流 times rated current
动作时间(ms) Operating time (ms)	3 倍动作电流 ≤ 35 times operating current
制动系数 Braking coefficient	> 3
闭锁角 Blocking angle	> ± 60°
功耗(VA) Power consumption (VA)	≤ 1.5
触点容量 Contact capacity	220V,0.5A DC 有感 30W;AC 40VA inductive

### 3 安装开孔尺寸、接线图 Mounging plate opening size,Wiring drawing
