Monitoring Relays Motor temperature Types DTA01, PTA01, DTA02, PTA02

- Motor temperature monitoring relay
- Measuring ranges: PTC according to EN 44081
- Remote and local alarm reset (DTA02, PTA02)
- · Output: 8 A SPDT relay normally energized
- For mounting on DIN-rail in accordance with DIN/EN 50 022 (DTA01, DTA02) or plug-in module (PTA01, PTA02)
- 22.5 mm Euronorm housing (DTA01, DTA02) or 36 mm plug-in module (PTA01, PTA02)
- LED indication for relay and power supply ON (DTA02,
- Galvanically separated power supply

Product Description

DTA01, DTA02, PTA01 and PTA02 are precise thermistor monitoring relays.

They can be used to monitor the temperature of the coils of a motor with built-in PTC's. The alarm status of the relay can be reset by either an external contact or an internal button (DTA02, PTA02).

The test button allows the simulation of the fault condition (DTA02, PTA02).

The red LED indicates the alarm status.

Mode of Operation

DTA01, DTA02, PTA01 and PTA02 monitor the resistance value of the PTC resistors connected to the terminals T1 and T2 (or 5 and 6). This value is related with their temperature (often the three coils of a motor) so to offer a prompt reaction to over temperature.

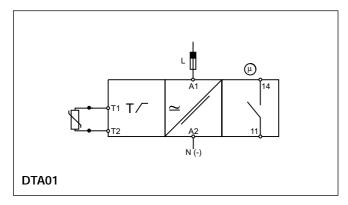

Example 1 - DTA01 or PTA01 The relay operates as long as the measured resistance is below the rated value. The relay releases if the measured resistance (i.e. the temperature of the motor coils) exceeds the rated val-

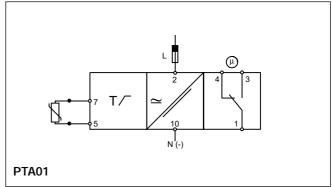

Example 2 - DTA02 or PTA02 The relay operates and the yellow LED is ON as long as the measured resistance is below the rated value. The relay releases and the yellow LED is OFF if the measured resistance (i.e. the temperature of the motor coils) exceeds the rated value. Provided that the resistance has dropped below the rated value (i.e. the temperature of the motor coils has returned cold), the relay operates when the interconnection between terminals Z1, Z2 or 8, 9 is interrupted or the reset button on the front of the unit is pressed.

General Specifications

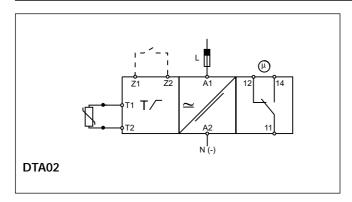

General Specificati	0113
Reaction time	
Alarm ON delay	< 150 ms
Reset delay	(resistance rising from -20% to +20% set value) < 500 ms (resistance decreasing from +20% to -20% set value)
Accuracy	(15 min warm-up time)
Temperature drift Repeatability	± 1000 ppm/°C ± 0.5% on full-scale
Indication for	
Power supply ON Relay ON	LED, green LED, yellow
Environment	(EN 60529)
Degree of protection	IP 20
Pollution degree	3 (DTA01, DTA02), 2 (PTA01, PTA02)
Operating temperature	-20 to 60°C, R.H. < 95%
Storage temperature	-30 to 80°C, R.H. < 95%
Housing dimensions	
DIN-rail version	22.5 x 80 x 99.5 mm
Plug-in version	36 x 80 x 87 mm
Weight	Approx. 150g
Screw terminals	
Tightening torque	Max. 0.5 Nm
	acc. to IEC 60947
Approvals	UL, CSA
CE Marking	Yes
EMC	Electromagnetic Compatibillity
Immunity	According to EN 61000-6-2
Emission	According to EN 50081-1
