

# 45Amp, 10.16 mm pitch, Board to Wire Connector for Internal Power Supply

DF60 Series

(UL, C-UL, TÜV certified product)

## ■ Features

### 1. High current capacity

Capable of going to a max. of 45A when using AWG #8 with the single position connector. (Please refer to the chart for the rated current in other pin counts.)

### 2. Secure lock mechanism ensures complete mating

A secure lock mechanism with a clear tactile and audible click prevents insufficient mating. (Please refer to Figure 2)

### 3. Highly reliable 5-point contact structure

Three independent contact springs provide a secure contact with high contact reliability using 5-point of contact. (Please refer to Figure 3))

### 4. Molded lance design

The lance is actually part of the housing instead of being part of the terminal. This prevents tangled wires during assembly.

### 5. Mis-insertion prevention for headers

The addition of a molded pin on the header allows temporary mounting retention and prevents reverse mounting on the PCB. (Please refer to Figure 1). ( Right angle pin header has a metal fitting for this purpose)

### 6. Prevention of solder cracks

Glass-reinforced resin is used on pin header to prevent solder cracks due to thermal contraction.

### 7. Design Prevents short-circuits between contacts

The wall structure between contacts isolates the contacts and prevents short circuits from occurring. (Please refer to Figure 1)

### 8. Compliant to UL, C-UL and TÜV specifications

Item	Specifications	Conditions
1. Insulation resistance	No less than 1,000 MΩ	Measured at DC=1,000V
2. Withstand voltage	No flashover or breakdown	AC 3,000V applied for one minute.
3. Contact resistance	No more than 2 mΩ	Measured at 1A and not greater than 6V
4. Vibration Resistance	No electrical discontinuity of 1μs or greater	Frequency 10 - 500Hz, accelerated velocity 98 m/s <sup>2</sup> , 2 hours for each of the three axis directions
5. Shock Resistance	No electrical discontinuity of 1μs or greater	Accelerated velocity: 490m/s <sup>2</sup> , for 11 ms, half-sine wave form in 3 directions, 3 times for each of the three directions
6. Moisture-resistance	Contact resistance: no more than 2 mΩ; insulation resistance: no less than 1,000 MΩ	Temperature: 40±2°C; humidity: 90 to 95%, left for 96 hours
7. Temperature cycles	Contact resistance: no more than 2 mΩ; insulation resistance: no less than 1,000 MΩ	-55°C: 30 minutes → 85°C: 30 minutes) 25 cycles
8. Durability	Contact resistance No more than 2 mΩ	30 mating/unmating cycles
9. Solder heat resistance	There should be no melting of the resin part which will influence the performance.	Flow: 260°C, 10sec Hand soldering: temperature of soldering iron at 350°C±10°C for 5 seconds

(Note 1) This is the maximum current rating while all pins are powered or used as all power lines. If you split the current over multiple lines, please factor in your own safety margin.

(Note 2) Includes the temperature rise of power lines.

(Note 3) The storage condition refers to long-term storage of the product on the shelf before assembly. Please use the operating temperature for temporary storage such as pre-assembly and during shipping.

(Note 1) Please use a press that generates 3.5tons.

(Note 2) Please contact our Sales Department when you are using crimp tools made by other manufacturers.

(Note 3) Please do the crimping operations according to the "Crimping work standards" and "Crimping condition table".

## ◆ Removing Contacts

- Contact extraction tool: precision screwdriver (flathead screwdriver with 1.4mm in width across flats)
- For Crimp contacts: DF60-8SC(F)A, DF60-1012SC(F)A, DF60-8PC(F)A, DF60-1012PC(F)A
- Procedure

Sectioned drawing of the housing

1. After unmating the parts, position the screwdriver to raise the lance as shown in the illustration.

Before attempting to remove any contacts, make sure that the power is switched off and the system is de-energized.

2. The lance needs to be raised sufficiently to allow the terminated wire to slip past it. The lance needs to be held up while at the same time pulling on the wire

Due to any previous repairs, the strength of the lance could have been compromised. Hirose recommends the use of a new crimp housing to assure proper performance.

### Caution

Please be very careful when removing the contact work so that you don't become injured by the protruding part of the crimp contact.

## ◆ Precautions for use

1. The connector could be damaged if it is pulled out forcibly. When it is hard to pull out, push it in slightly first and then depress the lock and un-mate.
2. When thick, short sections of wire are used, the connector could be deformed due to the force of the wires' position. Route cables in such a way that they do not twist when being installed.
3. Make sure to turn off the power when mating or un-mating the connector.
4. Please do not touch any area around the contact part with your hand when the power is on; it could be very dangerous.
5. Please contact our Sales Department about the assembly procedure and the instruction manual.

## ◆ Rated values

Please avoid using the device above the rated values. Also, do not insert or pull out energized or "live" wires.

## ◆ Operating environment

Please contact us if you are designing this connector into environmental conditions where high and low temperatures are repeated.

## ◆ Mated dimensions

### ● Board-to-Wire Connection using the straight pin header

### ● Board-to-Wire Connection using the right angle pin header.

### ● In-line or Wire-to-Wire Connection

## ◆ Precautionary notes

<p>1. Recommended soldering conditions</p>	<ul style="list-style-type: none"> <li>■ Soldering profile when using an automatic soldering device Soldering temperature: 260°C ; Soldering time: no more than 10 seconds</li> <li>■ Hand soldering conditions Temperature of soldering iron: 350±10°C , soldering time: no more than 3 seconds</li> </ul>
<p>2. Cleaning Conditions</p>	<p>Please refer to the "Nylon Connector Guide". Cleaning with IPA is allowed. (Other cleaning agents are not recommended due to the fact that it may change the push/pull feeling. Please contact us when you use other cleaning agents. )</p>
<p>3. Wiring condition</p>	<p>Please refer to the "Nylon Connector Guide" and "DF60 Harness procedure".</p>
<p>4. Important notes</p>	<ul style="list-style-type: none"> <li>■ Caution is required for mating and un-mating the connector without it being mounting on a PCB. Doing so can damage or deform the contacts.</li> <li>■ During hand soldering, do not apply excess amounts flux which can migrate on to the connector.</li> <li>■ This product may have a slight differences in color depending on the production lot. This difference does not have any influence on the performance.</li> <li>■ Please refer to "DF60 Harness procedure" for the handling precautions during mating and un-mating operations.</li> </ul>
<p>5. Handling instructions</p>	<p>Please refer to the "Nylon Connector Guide".</p>
<p>6. Right angle pin header Precautions for use</p>	<div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <p>Since the lead mounting part has some exposed parts, please insure sufficient clearance when mounting other parts near this connector.</p> </div> </div>
<p>7. In-line connector Panel fixing operation</p>	<div style="display: flex; flex-wrap: wrap;"> <div style="width: 50%;"> <p>① Insert a M3 nut from the lateral direction.</p>  </div> <div style="width: 50%;"> <p>② Push the nut in the direction of the arrow.</p>  </div> <div style="width: 50%;"> <p>③ Nut insertion is then complete.</p>  </div> <div style="width: 50%;"> <p>④ Panel mounting is completed by installing a connector on the panel cutout hole and tightening with a M3 screw. Torque value is 49N-cm max.</p>  </div> </div>
