

## Our high cycle life valves will keep your system running!

Tescom makes an extensive line of highly reliable valves that are earning patents and even awards as they set new standards in the number of on-off cycles achieved.

 We never use castings. Our entire valve line is precision machined from bar stock.

 Extra features like a balanced main valve and seat-saving metal stops make Tescom valves extremely durable in the most demanding applications.

 Our VA valve was named "Breakthrough Product of the Year" by a leading trade publication in 2002.

• In an independent application test, one of our standard valves achieved over 250,000 cycles: 128 times the life of the big-name brand used originally (details on file).

 We've secured numerous U.S. patents for our innovative designs. Recent firsts include a unique air operated 'balanced' valve and an 'in-line' configured high pressure valve with a flow of Cv = 12!

### Standard, modification or custom — we'll find the solution!

- Tescom will do what it takes to find a fit for your application.
- We truly thrive on custom solutions. No order is too small!
- Our wide range of standard models allow almost limitless modification - materials, porting, actuation, seals, etc.
- Besides Stainless Steel, we can make any valve in brass, Monel, Hastelloy<sup>®</sup>, Titanium or other material.
- Actuation methods available include: multi-turn, solenoid, air, lever and electronic controller.
- Several Tescom valves can be used at very wide ranges some at 0-15,000 psi.
- Ask us about a drop-in replacement for your existing valve.

FL7000 Flow Limit Valve

VK Block and Bleed

#### **Cartridge Valves**

- Externally threaded and designed to be easily installed in a manifold block
- Reduces piping and eliminates connections
- Reduces space requirements and makes servicing easier
- Can be furnished in a wide variety of valve styles
- Contact factory for application assistance

For OEM users, private labelling is available.

Don't see what you need? Call our application engineers at 800-447-1250. We may already have the exact modification you're looking for... or we'll create one to suit your needs!

### Custom Assemblies, Manifolds & Systems

Tescom is an experienced provider of high quality manifolds, custom assemblies and systems for control of pressure and flow. We can simplify your existing system or create a new one to meet your needs.

#### Tescom provides:

- The know-how and experience to integrate components made by Tescom and others. Get one-on-one engineering support to find the best solution!
- A very large selection of existing valves, regulators and flow components: ranges from vacuum to 30,000 PSIG.
- A wide array of dome and air-loaded regulators combined with electronic pressure controllers to automate pressure routines.
- Integrated electronics and custom software, if required.

High pressure valve manifold used to calibrate transducers

Made-to-spec valve & regulator hydraulic control panel

Panel used in a fueling application includes valves, regulators & integrated electronics

Aircraft charging cart manifold panel incorporates VA cartridge style valves with lever actuation

### Tescom: an innovator in pressure control for over forty years!

- Tescom Corporation, originally founded in 1917, has designed and manufactured valves, pressure regulators, electronic controllers, manifolds and systems for over forty years.
- Distributor support centers are located in major cities worldwide, providing application assistance and quality Tescom product.
  Direct sales offices are located in California, New Jersey, Scotland and South Korea.
- Elk River, Minnesota and Selmsdorf, Germany are the homes of our two design and manufacturing facilities.
- Tescom serves all industrial markets. Our valued customers are the recognized leaders in their field.
- Our quality system is ISO 9001 certified. We are approved by the Japanese government as a METI Self-Inspecting Manufacturer
