

P Range Vertical Pumps

Mono can now provide vertical pumps specifically designed for arduous duties found within the oil, gas and industrial sectors.

Utilising existing rotor/stator combinations, each pump is designed and custom built for specific applications. All designs will incorporate the unique Flexishaft[®] drive that connects the shaft to the eccentrically orbiting rotor. The Flexishaft eliminates wearing parts and therefore the need for lubrication and benefits the user with a pump design that has increased reliability coupled with reduced maintenance costs.

The Flexishaft is also supported by a 5 year warranty.

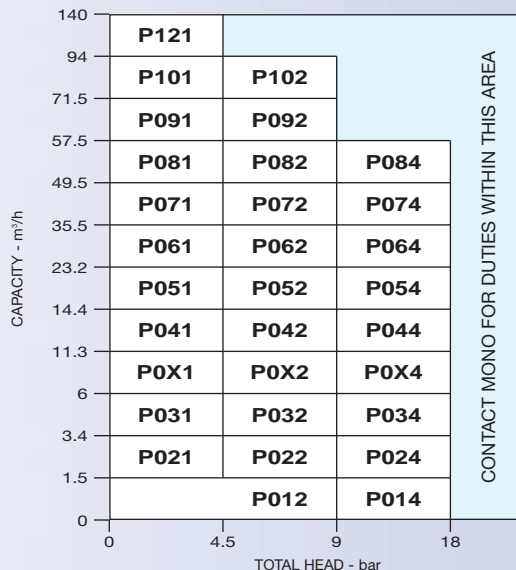

Pump Materials

- Carbon Steel
- Stainless Steel
- Duplex Steel
- Super Duplex Steel

Applications

- Open and closed drains
- Separator feeds
- Low shear (low emulsification)
- Abrasive materials (fractional sands)
- High viscosity fluids (blowdown sludges)
- Multiphase capability
