

- SDI-12 Small Bore Submersible Level Transducer
- ±0.10% FS Total Error Band
- Optional Lifetime Lightning Protection
- Two year warranty

The MEAS KPSI 353 submersible hydrostatic level transducer is specifically designed for small bore applications and to meet the rigorous environments encountered in ground water level measurements. Incorporating a highly stable media-isolated sensor, the MEAS KPSI 353 features SDI-12 serial-digital interface. SDI-12 is a standard for interfacing data recorders with microprocessor-based sensors, especially in the environmental monitoring field. The MEAS KPSI 353 is intended for applications with requirements that include battery-powered operation with minimal current drain, low system cost, and use of a single recorder with multiple sensors "daisy-chained" on one cable. It will accommodate cable lengths between sensors and recorder up to 200 feet. New removable cable option allows easy substitution of transducers and cables.

APPLICATIONS

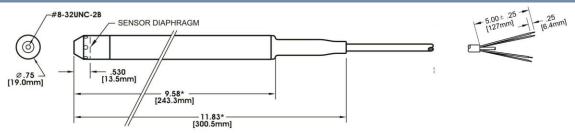

- Groundwater Monitoring
- Down Hole
- Surface Water Monitoring
- Tailrace and Forebay Monitoring
- Oceanographic Research

FEATURES

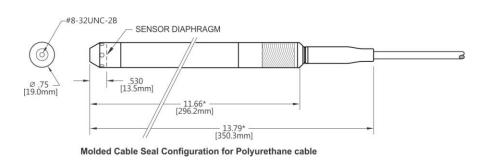

- Removable cable option
- Custom Polyurethane or ETFE Cable Lengths
- Welded 316SS or Titanium
- Custom Level Ranges up to 230 ft (70m) H₂O
- Shipped with Long-Life Vent Filter

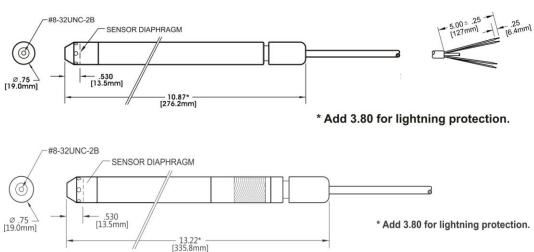

dimensions

* Add 3.80 for lightning protection.

Approximate Weight	0.75 lbs (340 g) transducer 0.05 lbs/ft (79 g/m) cable			
Cable Jacket Material	Polyurethane (standard) ETFE (optional)			
Cable Pull Strength	200 lbs (90 kg)			
Cable Number of Conductors	4			
Cable Conductor Size	22 AWG			
Cable Seal	Molded Polyurethane FKM Gland	for polyurethane cable for ETFE cable		
LIGHTNING PROTECTION (power	supply needs to be limited to 150mA to avoid lo	ck up of the gas tube after a suppression event)		
Life Expectancy	>1,000 Operations	<u>-</u> ,		
Peak Clamping Voltage	36 Volts			
Response Time	<10 nsecs			
Shunts	20,000 Amperes			

ordering info

The part number requires two level range limits, corresponding to the maximum and minimum analog outputs of the transducer, to be specified in **pounds per square inch (psi)** to three decimal places. The lower level range is typically 000.000 unless otherwise required. For reverse output requirements, enter the lower level range for the maximum output signal and the upper range for the minimum output. Use the following conversion factors:

ft H_2O / 2.3073 = psi Examples: 10 ft H_2O / 2.3073 = 4.334 psi (enter 004.334 in the part number) 10 m H_2O / 0.703265 = psi (enter 014.219 in the part number)

For sealed gage reference add local atmosphere when converting to psi. Contact MEAS for assistance. Example: $10 \text{ ft H}_2\text{O} / 2.3073 + 14.7 = 19.034 psi$ (enter 019.034 in the part number)

Units of measure on standard MEAS label. Contact Measurement Specialties if private labeling is required.
